SUMMARY

Flutter developer with 3.5+ years shipping 20+ production iOS and Android apps for Saudi companies (30K+ downloads). I own the mobile side end to end: estimate, build, App Store and Google Play listing, then crash reports and the next slice. Most products are two binaries — the customer app and the merchant, driver, or provider app — with real payments (Mada, Visa, Apple Pay, Tabby, Tamara, HyperPay), in-app wallets, and feature-first Clean Architecture with BLoC/Cubit. Came into Flutter after QA and client work, so a ticket still has to survive a store listing.

SKILLS

Mobile: Flutter, Dart, iOS and Android store release, app flavors / multiple binaries, RTL and localization, performance profiling, camera, maps, native APIs

Architecture: Feature-first Clean Architecture, BLoC, Cubit, Provider, Riverpod, GetIt, repository / use case

Payments: Mada, Visa, Apple Pay, Tabby, Tamara, HyperPay, PayTabs, in-app wallets, payouts

Realtime and product: Pusher, Agora, Zego, Firebase, FCM, deep linking, Google Maps, live tracking, QR redeem, KYC, vendor ops, Crashlytics, CI/CD

WORK EXPERIENCE

Flutter Developer, Wady

Feb 2026 – Present

Riyadh, Saudi Arabia · Remote

- Own the Flutter side of client products from estimate through store release, then keep the listing live.
- Marketplace and RFQ work: custom orders, merchant bidding, fulfillment steppers, and returns.
- Listing, matching, and vendor-ops products: filters, in-app chat, KYC, branches/staff, and QR redeem.

Flutter Developer, Topline

Aug 2024 – Feb 2026

Riyadh, Saudi Arabia · Remote

- Technical point of contact on a client social platform: stories, real-time chat, groups, subscriptions, an in-app camera, and paid creator video sessions.
- Split feature work across a 3-developer Flutter team and held final say on technical decisions.
- Evaluated third-party AR/camera-filter vendors after the existing SDK became a cost issue, and presented technical and cost trade-offs to the client.

Flutter Developer, Wady

Jan 2023 – Aug 2024

Riyadh, Saudi Arabia

- Shipped 10+ production apps and kept them live — store listings, payments, and the features each product actually needed.
- On-demand and booking products: packages, wallets, timed services, job steppers, shop accept/reject, extras, and payouts.
- Integrated Mada, Visa, Tabby, Tamara, HyperPay, and in-app wallets across those products.

Software Analyst & QA, Entlq

Jun 2021 – Feb 2023

Riyadh, Saudi Arabia

- Single client contact: turned asks into tickets the team could build, then tested the release before it went out.
- Kept scope and progress visible so engineering was not guessing.

PROJECTS

GTech — Quote-to-order spare-parts marketplace (Flutter; customer and merchant apps)

- Owners request parts by photo and spec. Merchants bid per item on availability, VAT, and delivery, then fulfill pickup or courier.
- In-app Pusher chat and marketing deep links. Shipped both apps to the App Store and Google Play.

Timey — Social platform with creator booking (Flutter, Pusher, Agora)

- Stories, real-time chat, groups, subscriptions, an in-app camera, paid creator video sessions, and a self-serve ads flow.
- Technical point of contact on a 3-person Flutter team, including AR-filter vendor evaluation.

Captainz — On-demand car wash (Flutter; customer and rider apps)

- 12K+ iOS and 10K+ Android downloads; 5.0 rating (164 reviews).
- Book at a saved pin or buy a package; wallet/Mada checkout, extras, live map dispatch, referral deep links, and a captain points board.

Vero — Car and AC wash (Flutter; customer and provider apps)

- 14.2K iOS and 1,000+ Android downloads.
- Gift a visit, packages, wallet/Mada checkout. Providers run a job stepper with before/after photos.

Magnet — Custom commerce (Flutter; customer and merchant apps)

- Company and freelancer shops with size, color, and made-to-measure orders.
- Merchants accept or reject, handle returns, run a fulfillment stepper, and run scratch-to-win promotions.

GlowUp — Salon and spa booking (Flutter; customer and provider apps)

- Four verticals, timed services, then a barber or the cart. Pay wallet, Mada, or cash.
- Shops accept or reject, add extras mid-job, and withdraw.

WarshaStation — Workshop storefront (Flutter; customer and vendor apps)

- Each workshop is a store for services, parts, and rental. Book a slot or check out.
- Vendors pass KYC, run branches and staff, redeem jobs by QR, and chat in-app on Pusher.

Soapy — On-demand car wash (Flutter; customer and captain apps)

- 5.32K iOS and 500+ Android downloads.
- Named packages with extras included. Tabby, Mada, or wallet. Captains run a date-filtered earnings dashboard.

Invastro — Owners and investors (Flutter; iOS and Android)

- List a project or find capital; filter by city, sector, and funding; in-app Pusher chat without sharing a phone number.

EDUCATION

Faculty of Arts, Helwan University
Cairo, Egypt

2018 – 2021
