SUMMARY

Senior Flutter developer with 3.5+ years shipping production iOS and Android apps across different product types — social, marketplace, booking, and others — 20+ live store listings and 30K+ downloads. I own the mobile side from estimate through App Store and Google Play, on both the customer and provider apps. I work with the client on scope and technical trade-offs, then set the architecture and ship under the deadline. On a client product I led a small Flutter team: estimates, how the work was split, and the technical calls.

SKILLS

Mobile: Flutter, Dart, REST APIs, iOS and Android store release, app flavors / multiple binaries, RTL and localization, performance profiling, camera, maps, native APIs

Architecture: Feature-first Clean Architecture, BLoC, Cubit, Provider, Riverpod, GetIt, repository / use case

Payments: Mada, Visa, Apple Pay, Tabby, Tamara, HyperPay, PayTabs, in-app wallets, payouts

Realtime and product: Pusher, Agora, Zego, Firebase, FCM, deep linking, Google Maps, live tracking, QR redeem, KYC, vendor ops, Crashlytics, CI/CD, Git

WORK EXPERIENCE

Flutter Developer, Wady Feb 2026 – Present
Riyadh, Saudi Arabia · Remote

- Own the Flutter side of client products from estimate through store release, then keep the listings live.
- Own quote-to-order marketplace work on customer and merchant apps: RFQ, bidding, fulfillment, and returns.
- Own listing/matching and vendor-ops products on both apps, including KYC and QR redeem.

Flutter Developer, Topline Aug 2024 – Feb 2026
Riyadh, Saudi Arabia · Remote

- Technical point of contact on a client social platform — stories, chat, groups, camera, subscriptions, and paid creator sessions.
- Split work across a 3-developer Flutter team and held final say on technical decisions.
- Evaluated AR/camera-filter vendors after the client cut the existing SDK over cost, and presented technical and cost trade-offs.

Flutter Developer, Wady Jan 2023 – Aug 2024
Riyadh, Saudi Arabia

- Shipped 10+ production apps and kept them live, including store listings and payment integrations.
- Owned customer and provider apps for on-demand and booking products: packages, wallets, job flow, and payouts.
- Integrated Mada, Visa, Tabby, Tamara, HyperPay, and in-app wallets across those products.

Software Analyst & QA, Entlq Jun 2021 – Feb 2023
Riyadh, Saudi Arabia

- Single client contact: turned asks into tickets the team could build, then tested the release before it went out.
- Kept scope and progress visible in Trello so engineering was not guessing.

PROJECTS

Screenshots: mohamed-ayman-dev.github.io. Client source is private (NDA); walkthrough on a call.

GTech — Quote-to-order spare-parts marketplace (Flutter; customer and merchant apps) · App Store · Google Play · Business · App Store · Business · Play

- Own both apps. RFQ by photo and spec, merchant bids, in-app chat, and fulfillment — not a catalog.

Timey — Social platform with creator booking (Flutter; client project; Pusher, Agora)

- Stories, realtime chat, groups, in-app camera, subscriptions; creator side has paid video sessions and a self-serve ads flow.

Captainz — On-demand car wash (Flutter; customer and rider apps) · App Store · Google Play · Rider · App Store · Rider · Play

- 12K+ iOS and 10K+ Android; 5.0 rating (164 reviews). Own both apps: on-demand wash at a pin, extras, live tracking, and rider earnings.

Vero — Car and AC wash (Flutter; customer and provider apps) · App Store · Google Play · Provider · Play

- 14.2K iOS and 1,000+ Android. Own both apps: packages, booking, live map tracking, and job status on the provider side.

Magnet — Custom commerce (Flutter; customer and merchant apps) · App Store · Google Play · Provider · App Store · Provider · Play

- Own both apps: company/freelancer shops, made-to-measure requests, orders/returns, and status through delivery.

EDUCATION

Faculty of Arts, Helwan University 2018 – 2021

Cairo, Egypt · Arabic (native) · English (professional working)
