SUMMARY

Mid-Senior Flutter Developer with 4 years specializing in production Flutter and 5+ years in software engineering. Shipped 18+ live store listings and 30K+ downloads across Saudi Arabia and Egypt — delivering both customer and provider binaries from discovery to store releases. Pragmatic in architecture and state management (BLoC, Cubit, Riverpod, Provider): choosing the right structure based on project scale and timelines without dogmatic over-engineering. Experienced technical point of contact for multi-developer teams, guiding estimates, architectural decisions, and production-grade integrations (GCC payments, live video, maps, and real-time chat).

SKILLS

Mobile: Flutter, Dart, iOS and Android store release, app flavors / multiple binaries, RTL and localization, performance profiling, camera, maps
Architecture: Feature-first Clean Architecture, BLoC, Cubit, Provider, Riverpod, GetIt, repository / use case, go_router, auto_route, Dio
Payments: Mada, Visa, Apple Pay, Tabby, Tamara, HyperPay, PayTabs, in-app wallets, payouts
Realtime and product: Pusher, Agora, Zego, Firebase, FCM, deep linking, Google Maps, QR redeem, Crashlytics, GitHub Actions

WORK EXPERIENCE

Mid-Senior Flutter Developer, Topline Jul 2024 – Jun 2026
Saudi Arabia · Remote

- Technical point of contact on Timey, the client social platform: stories, realtime chat, groups, and in-app camera.
- Subscriptions and paid creator video sessions (Pusher, Agora). Shipped other client Flutter deliverables concurrently.
- Split sprint work across a 3-developer team, refactored existing codebase, and governed architecture and state decisions.
- Collaborated directly with client on technical trade-offs and vendor evaluations (including AR/camera SDK alternatives).

Mid-Level Flutter Developer (Freelance), Wady Jan 2023 – Jul 2024
Riyadh, Saudi Arabia

- Shipped 10+ live store listings across two-sided marketplaces, on-demand logistics, and booking (customer, provider, and merchant apps).
- Owned full product lifecycle: scope estimates, architecture, development, store submission, and ongoing releases.
- Integrated production GCC payment gateways (Mada, Visa, Apple Pay, Tabby, Tamara, HyperPay), in-app wallets, and provider payouts.
- Built reusable modular foundations, real-time features, push notifications (FCM), deep linking, and REST networking (Dio).

Software Analyst & QA, Entlq Feb 2022 – Apr 2023
Saudi Arabia · Remote

- Analyzed product requirements from inception to delivery and conducted pre-release QA validation.
- Managed releases for JAK F&B (B2B supply and driver app), Rawand (office equipment), Tala Care (childcare), and Match (pitch booking).
- Structured client requirements into organized sprint backlogs and Trello tickets with clear acceptance criteria.

Game Developer (Freelance), Unreal Engine User Group Mar 2020 – Mar 2021
Remote

- Developed interactive experiences and game mechanics using Unreal Engine, C++, and Blueprints.
- Built gameplay prototypes, level logic, and performance-optimized interactive systems.

PROJECTS

Screenshots of the apps below: mohamed-ayman-dev.github.io

Vero — Car and AC wash (customer and provider apps)
Customer: App Store · Google Play · Provider: Google Play

- 14.2K iOS and 1,000+ Android. Customer: car wash and AC wash — packages, booking, orders, maps, and coupons. Provider: stats, job follow-up, the customer’s pin, and status changes through the job.

Captainz — On-demand car wash (customer and rider apps)
Customer: App Store · Google Play · Rider: App Store · Google Play

- 12K+ iOS and 10K+ Android; 5.0 (164 reviews). Customer: on-demand wash at a saved pin — packages, extras, gift a wash, and Noon/Carrefour vouchers. Rider: earnings, map to the customer, status changes, and a points leaderboard.

Timey — Social platform with creator booking (client project; Pusher, Agora)

- User side: stories, realtime Pusher chat, groups, trending, in-app camera, subscriptions, and tips.
- Creator side: paid Agora video sessions and a self-serve ads flow. Technical point of contact on a 3-developer team, including client trade-offs such as AR-filter vendor options after they cut the existing SDK over cost.

GTech — Quote-to-order spare-parts marketplace (customer and merchant apps)
Customer: App Store · Google Play · Merchant: App Store · Google Play

- Customer app: spare-parts RFQ by photo and spec (part number, condition, VIN) — compare merchant bids, in-app chat, orders, and pickup or courier status.
- Merchant app: sales stats, RFQ inbox, per-line quotes with VAT, filters by status, map/customer location, fulfillment status changes, KYC, and paid store plans.

Invastro — Owners and investors (one app, two roles)
App Store · Google Play

- Owner side: list a project with photos, city, sector, capital, view counts, and a hide-phone toggle.
- Investor side: browse and filter by city, sector, and funding; favorites; in-app Pusher chat without sharing a number.

Magnet — Custom commerce (customer and merchant apps)
Customer: App Store · Google Play · Merchant: App Store · Google Play

- Customer app: company and freelancer shops — size/color, made-to-measure requests, cart, orders, returns, coupons, and scratch-to-win.
- Merchant app: sales stats, queues for orders/returns/custom requests, filters by status, accept/reject, and status changes waiting → preparing → out for delivery.

Soapy — On-demand car wash (customer and captain apps)
Customer: App Store · Google Play · Captain: Google Play

- 5.32K iOS and 500+ Android. Customer: named packages with extras, map pin, coupons, reschedule, Tabby/Mada/wallet. Captain: date-filtered earnings, current vs completed jobs, and status changes.

WarshaStation — Workshop storefront (customer and vendor apps)
Customer: App Store · Google Play

- Customer app: each workshop is a store — services as the core, plus parts and rental; slot booking, cart, orders, map, chat, and coupons.
- Vendor app: stats, KYC, branches and staff, order follow-up, accept/reject, QR job redeem, and status changes.

GlowUp — Salon and spa booking (customer and provider apps)
Customer: App Store · Google Play · Provider: App Store · Google Play

- Customer app: four verticals (men's/women's salon and spa) — timed services, pick a barber or the cart, orders, map, coupons, wallet/Mada/cash.
- Provider app: income stats, order follow-up, filters by status, accept/reject, add extras mid-job, status changes, and withdraw.

EDUCATION

Bachelor's, Faculty of Arts, Helwan University 2018 – 2021
Cairo, Egypt
Self-directed courses on Udemy and similar platforms, in Flutter and software engineering. Too many to name one by one.

LANGUAGES

Arabic (native) · English (professional working)
