SUMMARY

Flutter developer with 3.5+ years shipping production iOS and Android apps, and over 5 years in software, primarily in the Saudi market and also Egypt, across social, marketplace, booking, and others — 20+ live store listings and 30K+ downloads. I have shipped the mobile side from estimate through App Store and Google Play, on both the customer and provider apps. I have handled client scope and technical trade-offs, set the architecture in feature-first Clean Architecture and BLoC, and shipped under the deadline. On a client product, technical point of contact for a 3-developer Flutter team: estimates, how the work was split, and the technical calls.

SKILLS

Mobile: Flutter, Dart, iOS and Android store release, app flavors / multiple binaries, RTL and localization, performance profiling, camera, maps

Architecture: Feature-first Clean Architecture, BLoC, Cubit, Provider, Riverpod, GetIt, repository / use case, go_router, auto_route, Dio

Payments: Mada, Visa, Apple Pay, Tabby, Tamara, HyperPay, PayTabs, in-app wallets, payouts

Realtime and product: Pusher, Agora, Zego, Firebase, FCM, deep linking, Google Maps, QR redeem, Crashlytics, GitHub Actions

WORK EXPERIENCE

Flutter Developer, Wady

Feb 2026 – Present

Riyadh, Saudi Arabia · Remote

- I build and maintain Wady's Flutter apps — new products and the ones already live — from estimate through both stores. Most ship as two binaries (customer plus provider or merchant). Standups and meetings: scope, estimates, and timelines.
- Marketplace and RFQ: custom orders, merchant bidding, fulfillment, and returns (BLoC, Clean Architecture, GitHub Actions).

Flutter Developer, Topline

Jul 2024 – Feb 2026

Riyadh, Saudi Arabia · Remote

- Technical point of contact on the main client social platform — stories, realtime chat, groups, in-app camera, subscriptions, and paid creator video sessions (Pusher, Agora). Other Flutter work ran alongside when Topline asked.
- Split work across a 3-developer Flutter team, refactored an existing codebase, and held final say on BLoC and Clean Architecture.
- Sat with the client on scope, blockers, and trade-offs across features — including AR / camera-filter vendors after they cut the existing SDK over cost.

Flutter Developer (Freelance), Wady

Apr 2023 – Jul 2024

Riyadh, Saudi Arabia · Remote

- Shipped 10+ live store listings across two-sided marketplace, on-demand, and booking products — customer, provider, and merchant apps, not a single listing per brand. Full lifecycle from estimate through store release.
- Architecture and reusable components. Real-time, push, deep linking, REST (Dio), and GCC payments (Mada, Visa, Tabby, Tamara, HyperPay, wallets).

Software Analyst & QA, Entlq

Oct 2022 – Jul 2024

Riyadh, Saudi Arabia · On-site

- Analyzed full products from inception to delivery and tested the same releases: JAK F&B, JAK Reman, Rawand, Tala Care, and Match.
- Broke client asks into tickets and arranged them on the Trello board for the team — order, scope, and status.

PROJECTS

Screenshots of the apps below: mohamed-ayman-dev.github.io

Vero — Car and AC wash (Flutter; customer and provider apps)

Customer: [App Store](#) · [Google Play](#) · Provider: [Google Play](#)

- 14.2K iOS and 1,000+ Android. Customer app: car wash as the core vertical, AC wash as the second — packages, service booking, orders, maps, and coupons.
- Provider app: stats, order follow-up, filters by job type, the customer's pin on the map, and status changes through the job.

Captainz — On-demand car wash (Flutter; customer and rider apps)

Customer: [App Store](#) · [Google Play](#) · Rider: [App Store](#) · [Google Play](#)

- 12K+ iOS and 10K+ Android; 5.0 rating (164 reviews). Customer app: on-demand car wash at a saved pin — packages, extras, booking, orders, maps, coupons, gift a wash, and Noon/Carrefour vouchers.
- Rider app: earnings, job follow-up, map to the customer, status changes through the job, and a points leaderboard.

Timey — Social platform with creator booking (Flutter; client project; Pusher, Agora)

- User side: stories, realtime Pusher chat, groups, trending, in-app camera, subscriptions, and tips.
- Creator side: paid Agora video sessions and a self-serve ads flow. Technical point of contact on a 3-developer Flutter team, including client trade-offs such as AR-filter vendor options after they cut the existing SDK over cost.

GTech — Quote-to-order spare-parts marketplace (Flutter; customer and merchant apps)

Customer: [App Store](#) · [Google Play](#) · Merchant: [App Store](#) · [Google Play](#)

- Customer app: spare-parts RFQ by photo and spec (part number, condition, VIN) — compare merchant bids, in-app chat, orders, and pickup or courier status.
- Merchant app: sales stats, RFQ inbox, per-line quotes with VAT, filters by status, map/customer location, fulfillment status changes, KYC, and paid store plans.

Invastro — Owners and investors (Flutter; one app, two roles)

[App Store](#) · [Google Play](#)

- Owner side: list a project with photos, city, sector, capital, view counts, and a hide-phone toggle.
- Investor side: browse and filter by city, sector, and funding; favorites; in-app Pusher chat without sharing a number.

Magnet — Custom commerce (Flutter; customer and merchant apps)

Customer: [App Store](#) · [Google Play](#) · Merchant: [App Store](#) · [Google Play](#)

- Customer app: company and freelancer shops — size/color, made-to-measure requests, cart, orders, returns, coupons, and scratch-to-win.
- Merchant app: sales stats, queues for orders/returns/custom requests, filters by status, accept/reject, and status changes waiting → preparing → out for delivery.

Soapy — On-demand car wash (Flutter; customer and captain apps)

Customer: [App Store](#) · [Google Play](#) · Captain: [Google Play](#)

- 5.32K iOS and 500+ Android. Customer app: car wash and named packages with extras included — booking, orders, map pin with radius, coupons, reschedule, Tabby/Mada/wallet.
- Captain app: stats, date-filtered earnings, job follow-up, filters by current vs completed, and status changes on the next job.

WarshaStation — Workshop storefront (Flutter; customer and vendor apps)

Customer: [App Store](#) · [Google Play](#)

- Customer app: each workshop is a store — services as the core, plus parts and rental; slot booking, cart, orders, map, chat, and coupons.
- Vendor app: stats, KYC, branches and staff, order follow-up, accept/reject, QR job redeem, and status changes.

GlowUp — Salon and spa booking (Flutter; customer and provider apps)

Customer: [App Store](#) · [Google Play](#) · Provider: [App Store](#) · [Google Play](#)

- Customer app: four verticals (men's/women's salon and spa) — timed services, pick a barber or the cart, orders, map, coupons, wallet/Mada/cash.
- Provider app: income stats, order follow-up, filters by status, accept/reject, add extras mid-job, status changes, and withdraw.

EDUCATION

Bachelor's, Faculty of Arts, Helwan University

2018 – 2021

Cairo, Egypt
